GROW WEALTH

Complete Client Features Guide

A clear walkthrough of every live feature in your USDT BEP-20 staking and team platform.

Join from \$1

Auto join after payment

1% Daily ROI

Runs every day on autopilot

2x ROI Cap

Clear earning limit

L1 to L7

Team income levels

What this PDF covers

Member signup and joining, deposits with Tx Hash and on-chain check, daily ROI, compound, withdraw, direct and level income, team tools, certificates, support, admin panel, and live website details.

Live site: <https://grow-wealth-neon.vercel.app>

Prepared as a client handover document for the full Grow Wealth system.

GROW WEALTH

Client Features Guide | USDT BEP-20 Platform

1. Platform overview

What your system does in simple words

Grow Wealth is a live web platform where members deposit USDT on BNB Smart Chain (BEP-20), join the plan, earn daily returns, invite people with a referral link, and withdraw income to their own wallet. You also get a full admin panel to approve payments, manage users, and run daily ROI.

1

Member app

Register, deposit, join, ROI reports, team, compound, withdraw, support, notifications

2

Admin panel

Approve deposits, credit or debit funds, pay withdrawals, run ROI, view history and team tree

3

Automation

Daily ROI cron at midnight UTC, auto join after approved payment of \$1 or more

4

Trust assets

Plan image viewer, certificates on landing page, live deposit feed, referral links

Live business rules (as running now)

- Joining and min deposit: \$1 | Max deposit: \$50,000
- Daily ROI: 1% every day | ROI cap: 2 times investment
- Direct income: 5% on joining | Levels: L1 to L7 (ROI ka ROI)
- Withdraw: min \$10 with 10% fee | Network: USDT BEP-20 only

2. How a member starts

Signup, wallet, deposit, and auto join

A) Create account

- Fields: full name, mobile, email, password, BEP-20 wallet address, country.
- Optional sponsor ID. Referral link format: /register?ref=GWxxxxxxx
- If sponsor is blank, company root GW0000001 is used.
- System creates User ID like GW1234567 and a 6 digit Transaction Password.
- Member can log in with User ID and password. Session lasts 7 days.

B) Deposit USDT (BEP-20)

- Member sends USDT on BSC to the company address or QR code.
- They can also connect MetaMask on BSC and send from the app.
- Then they submit Amount + Tx Hash. Duplicate Tx Hash is blocked.
- Admin approves. System reads the real on-chain USDT amount when possible.
- Fund balance and total deposited update from the verified amount.

C) Joining (activation)

- Min join amount is \$1.
- After an approved payment of \$1 or more, the member is joined automatically.
- There is also a manual Join page that can use existing fund balance.
- On join, the direct sponsor gets 5% direct income on the \$1 joining amount.
- Company root GW0000001 does not take direct income.

Balances explained

Fund Balance: deposits and compound.

Income Balance: ROI, direct, level, salary credits. This is what they withdraw.

USDT BEP-20 Balance: tracks deposit credits.

Safety checks

Wrong network risk is shown in UI.

On-chain amount override stops wrong typed amounts.

Blocked users cannot log in or earn.

Transaction Password protects withdraw and transfer.

GROW WEALTH

Client Features Guide | USDT BEP-20 Platform

3. How members earn

Daily ROI, direct, levels, and compound

Daily ROI (1%)

Credited once per UTC day for joined members.
Based on max of total deposited and joining amount.
Stops at 2x investment.
Runs by cron every midnight UTC.
Admin can also Run Daily ROI now.

Direct Income (5%)

Paid when a direct referral joins.
Based on \$1 joining amount.
Goes to sponsor income balance.
Shown in Direct Income report.
Not paid to company root or blocked accounts.

Level Income L1 to L7

Also called ROI ka ROI.
When a downline gets daily ROI, open uplines earn a share of that ROI.
Each level needs its own ROI target first.
L7 has no target.
Full table on the next page.

Manual Compound

Member moves money from income to fund.
This raises the ROI base.
Must be joined and have enough income.
No auto compound. Member chooses when.
Shown in wallet history as compound.

Example: \$100 stake can earn about \$1 ROI per day until total ROI reaches \$200.

Extra income types (admin credit)

Admin can manually credit Monthly Salary and Fast Track income. Member reports for these exist. There is no auto salary ladder in code yet. Use admin Other Income when you want to pay these by hand.

4. Team level table

Unlock with your own ROI, then earn from team ROI

Before earning from a level, the member needs their own total ROI to reach that level target. After unlock, they earn the level % from their downline daily ROI amount.

Level	Share of team ROI	Own ROI needed
L-1	10%	\$500
L-2	12%	\$1,000
L-3	15%	\$1,500
L-4	17%	\$2,500
L-5	20%	\$4,000
L-6	23%	\$7,500
L-7	25%	No target

Easy example

A person in your team gets \$5 ROI today.

If your L-1 is open (your own ROI is \$500 or more), you get 10% of \$5 = \$0.50.

If deeper levels are open, you can earn from those too.

Your own 1% daily ROI still runs on your stake at the same time.

Team pages for members: Direct Team, Level Team (full downline), referral link copy on Dashboard.

The screenshot shows a dashboard titled 'EXECUTIVE BUSINESS & MLM PLAN'. It includes a table with columns for 'Level', 'Share of team ROI', and 'Own ROI needed'. The table data is as follows:

Level	Share of team ROI	Own ROI needed
L-1	10%	\$500
L-2	12%	\$1,000
L-3	15%	\$1,500
L-4	17%	\$2,500
L-5	20%	\$4,000
L-6	23%	\$7,500
L-7	25%	No target

5. Withdraw, transfer, and member tools

Taking money out and day to day panel features

Withdraw

Min \$10 from income balance.
Always 10% fee.
Needs Transaction Password.
Paid to saved BEP-20 wallet.
Admin marks request as Paid.
History on Withdrawals page.

P2P Transfer

Move fund balance to another member.
Minimum \$5.
Needs Transaction Password.
Useful for internal fund move.
Shows in wallet history.
Both sides stay on platform.

Dashboard

Balances, join status, referral link, quick actions, recent transactions

Income reports

ROI Income, Direct Income, Level Income, Salary Income pages

Plan Details

Shows the official plan image clearly inside the app

Notifications

Platform announcements with unread badge in sidebar

Trading page

Mock crypto price board for look and feel (not live exchange trading)

My Account / Profile

Status, balances, profile details, account delete with password confirm

History pages

Deposit History, Wallet History, Withdrawals list

Support Ticket

Member opens subject + message. Sees admin reply and status

System Live Feed

Live successful deposits refresh about every 15 seconds

Certificates

Public certificate images on landing with enlarge and download

6. Admin panel features

Everything you control from /admin

Dashboard stats

Total users, joined users, pending withdrawals, total deposited at a glance.

Pending payments

Approve or reject joining and deposit requests. Approve uses on-chain amount when readable and can auto join.

Fund credit / debit

Add or remove member fund with a remark. Credit of \$1 or more can auto join.

Daily ROI tools

Run Daily ROI Now for everyone, or credit 1% ROI for one user with 2x cap check.

Other income

Manual credit for Direct, Level, Monthly Salary, or Fast Track income types.

Withdrawals

See pending requests and mark them Paid after you send USDT.

Users table

Search members, open History, open Team Tree, or delete a user (directs move to their sponsor).

User history

Deposits, credits, ROI, level/direct income, compound, withdraw, transfers (recent activity).

Team hierarchy

Expandable tree with name, ID, join status, counts, fund and deposited. Search by User ID.

Force join API

Backend support to force join paid users (script/API). Useful for migration fixes.

GROW WEALTH

Client Features Guide | USDT BEP-20 Platform

7. Certificates, plan, and public pages

What visitors and members see outside the wallet flow

The landing page shows brand story, plan viewer, certificates, FAQ, and clear call to action. Members also see the same plan image inside Plan Details.

Digital Asset Professional

Certified Crypto Trader

Public and member extras

- Landing page with plan image (no PDF chrome) and certificate lightbox + download
- Live deposit feed with total and today investment style stats
- Notifications system for announcements
- Support tickets for member help requests

Quick feature checklist

- ' Auth: register, login, sponsor check, GW User ID, Transaction Password
- ' Money in: USDT BEP-20 deposit, QR/address, MetaMask, Tx Hash, on-chain verify
- ' Earn: 1% daily ROI, 2x cap, 5% direct, L1 to L7, manual compound
- ' Money out: withdraw min \$10 + 10% fee, P2P transfer min \$5
- ' Team: referral link, direct team, full downline, admin hierarchy tree
- ' Admin: approve, fund credit/debit, ROI run, history, mark paid, user tools

A screenshot of the 'EXECUTIVE BUSINESS & MLM PLAN' page. It shows a table with columns for 'Level', 'Investment', 'ROI', 'Payout', and 'Status'. The table lists various levels of the plan, including 'Level 1', 'Level 2', 'Level 3', 'Level 4', 'Level 5', 'Level 6', 'Level 7', 'Level 8', and 'Level 9'. It also includes a section for 'Referral Bonus & P2P Transfer' and a 'Summary' section.

8. Client handover notes

How to use and present this system

Suggested demo flow for your client

1. Open the live site and show landing, plan, and certificates.
2. Register a demo member with a sponsor ID and show the new GW ID.
3. Show Deposit page (address/QR + Tx Hash submit).
4. From Admin, approve a deposit and show auto join + fund credit.
5. Show Dashboard balances, referral link, and income report pages.
6. Run Daily ROI (or wait for cron) and show ROI + level income path.
7. Show Withdraw request and Admin Mark Paid step.

Tech snapshot

Frontend: React (Vite)
Backend: Express API
Database: MongoDB
Hosting: Vercel (full stack)
Cron: daily ROI at 00:00 UTC
Chain: BSC / USDT BEP-20
Live: grow-wealth-neon.vercel.app

Good to know

Salary and Fast Track are manual admin credits for now.
Trading page uses mock prices.
Support API exists; reply from admin tools/API.
Always use BEP-20 USDT only for deposits and payouts.
ROI never goes past 2x of investment.

You are ready to present

This PDF is the full feature map of the system you built. Share it with your client so they can see member features, earning rules, admin control, and the live website in one place.

<https://grow-wealth-neon.vercel.app>

This guide is for client understanding of delivered features. Actual earnings depend on deposits, activity, team growth, and plan rules.

Thank you for choosing Grow Wealth.
