

# GROW WEALTH

## System Understanding Document

Product Build Spec (Reference UI: World Finance 24)

Product name: Grow Wealth

Reference URL: <https://worldfinance24.online/>

Dashboard: <https://worldfinance24.online/dashboard>

Prepared: 21 August 2026

Purpose: Document features, UI, flows & client business rules

Based on live reference-site analysis + client-confirmed product rules for Grow Wealth.

# 1. Document Overview

---

Product brand for this build is Grow Wealth. The client shared World Finance 24 (worldfinance24.online) as the UI/feature reference. This PDF captures the reference system plus Grow Wealth client rules (joining, ROI, wallet, database, brand).

## What Grow Wealth is

Grow Wealth is a web-based crypto investment / MLM platform (inspired by the reference site). Users register under a sponsor, deposit USDT on Binance Smart Chain (BEP-20) via crypto wallet, activate with \$1 joining, earn 2% ROI (24/7, credited manually by admin) plus network incomes, and withdraw to their USDT wallet. Admin panel manages users, deposits, withdrawals, ROI credit, and settings.

## Tech stack

- Frontend target: React SPA (Vite), dark/gold-style theme similar to reference
- Backend target: Node.js REST API + JWT auth
- Blockchain: BSC / USDT BEP-20 (Connect Wallet + Address/QR)
- Auth: User ID + password; Transaction Password for fund actions; Admin portal
- Database (client): MongoDB Atlas — MONGODB\_URI in .env (db name: growwealth)
- Product name everywhere in UI: Grow Wealth

---

## 1A. CLIENT CONFIRMED RULES (Grow Wealth)

---

These rules override the reference site package minimums and ROI marketing. Build Grow Wealth according to this:

- PRODUCT NAME = Grow Wealth
  - JOINING AMOUNT = \$1 ONLY (minimum activation / ID activation starts at \$1)
  - After joining with \$1, user can deposit ANY amount they want (no upper lock to fixed package-only top-ups unless client adds caps later)
  - Marketing / ROI = 2% (NOT the reference site 5%)
  - ROI timing = 24/7 (no restricted ROI window)
  - ROI credit mode = MANUALLY by Admin (not auto cron) — admin credits 2% ROI when due / as per operations
  - WITHDRAWAL: First withdrawal minimum = \$10; after first successful withdrawal, user can withdraw ANY amount
  - PAYMENT METHOD = CRYPTO WALLET (USDT on BEP-20 / BSC) — MetaMask, Trust Wallet, TokenPocket, WalletConnect, etc.
  - Wallet UX = OPTION C (BOTH): (1) Connect Wallet in-app pay + (2) Deposit address + QR for manual send from any wallet app
  - Deposit & Withdraw both via user crypto wallet (not bank / UPI / fiat gateway)
  - User must connect or save their BEP-20 wallet address; deposits sent as USDT (BEP-20); withdrawals paid to same/saved wallet
  - Database = MongoDB Atlas (db: growwealth)
  - Reference site used SAVING packages from \$2 / landing from \$10 / FAQ \$30 / 5% daily — DO NOT copy those for Grow Wealth
  - Recommended flow: Register !' Connect Wallet and/or Deposit Address+QR !' Deposit USDT "e \$1 !' Activate Joining (\$1) !' Further deposits anytime !' Admin credits 2% ROI (24/7 manual) !' Withdraw to crypto wallet
-

## 2. Branding & UI Design Language

- Brand (OUR PRODUCT): Grow Wealth — use this name on logo, title, emails, PDF, admin, landing
- Reference brand only: WORLD FINANCE24 (gold accent) — for layout inspiration, not final naming
- Primary palette target: deep navy/black backgrounds (#0b101e, #131927), gold accents (#e4c568 / #d4af37), green for positive money (#00ff88 / emerald)
- Landing: glass header, gold gradient text, dark cards, package/joining info, FAQ accordion, CTA
- Member area: left sidebar navigation (grouped sections), dark panels, metric cards, tables/lists for incomes & history
- Admin area: light theme sidebar (~260px), indigo active states, sectioned menus (Users, Security, Finance, etc.)
- Responsive: mobile-first grids (2-col cards), hamburger/drawer admin nav

## 3. Public / Marketing Website

### Pages & navigation

- Home (/) – Hero, Ecosystem, How it works (3 steps), Packages, FAQ, CTA
- Login (/login) – Member login with User ID + Password + Forgot Password
- Register (/register) – Sponsor ID, personal details, country, BEP-20 wallet, terms
- Forgot / Reset password routes
- FAQ (/faq) and Community Access pages also exist in router

### Landing value proposition (marketing copy)

- Claims deposits power HFT crypto trading + arbitrage + liquidity pooling
- Guaranteed 5% Daily ROI marketing message (REFERENCE site only — Grow Wealth uses 2% ROI, 24/7, Manual)
- 3 steps: Deposit USDT (BEP-20) !' Activate Package !' Earn & Withdraw

### Landing package table (marketing)

| # | Amount  | Cycle   | Daily ROI | Total Return |
|---|---------|---------|-----------|--------------|
| 1 | \$10    | 25 Days | 5%        | \$12.50      |
| 2 | \$50    | 25 Days | 5%        | \$62.50      |
| 3 | \$100   | 25 Days | 5%        | \$125.00     |
| 4 | \$250   | 25 Days | 5%        | \$312.50     |
| 5 | \$500   | 25 Days | 5%        | \$625.00     |
| 6 | \$1,000 | 25 Days | 5%        | \$1,250.00   |

REFERENCE ONLY (World Finance 24):  
FAQ ~\$30 min upgrade; SAVING from \$2.  
GROW WEALTH (client): Joining \$1 only; after that deposits flexible / any amount.

### Landing FAQ highlights

- Platform: decentralized crypto investment + daily ROI + referral bonuses
- Activation: deposit USDT BEP-20, then activate package from dashboard
- ROI: reference site = 5% daily auto | GROW WEALTH = 2% ROI · 24/7 · Manually by Admin

- Withdrawals (landing FAQ): daily 10:00 AM – 12:00 PM IST; min ~\$1–\$2; active package required

## 4. Authentication & User Account

---

### Registration fields (required)

- Sponsor ID (validated via API /auth/check-sponsor/:sponsorId)
- Name, Email, Mobile, Password, Confirm Password
- Country selector
- USDT BEP-20 Wallet Address (mandatory)
- Agree to Terms of Service
- On success: system returns generated User ID (format like WF#####) + Transaction Password (also emailed)

### Login

- Credentials: User ID + Password + JWT token
- Sample analyzed member: WF7832865 (role: user), sponsor WF5678089
- Forgot password + reset-password/:token flows present

### User profile data model (key fields)

- Identity: userId, name, email, mobile, role, sponsorId, createdAt, country
- Wallet: walletAddress + change history/limits; walletBalance; usdtBep20Balance
- Income buckets: directIncome, levelIncome, roiIncome, rewardIncome, fastTrackIncome, poolIncome (+ total\* lifetime counters)
- Package state: isToppedUp, topUpAmount, packages[], activePools[]
- Network: directCount, globalTeamCount
- Flags: isTelegramJoined, pendingWithdrawals, totalWithdrawn, totalEarnings

---

## 5. Member Dashboard – Navigation Map

---

Authenticated layout uses a grouped left sidebar. Exact menu structure rebuilt from frontend:

### Main Menu

- Dashboard (/dashboard)
- System Live Feed (/system-live-feed) – live deposit/investment ticker + totals
- Live Trading (/user/trading) – market symbols / trading UI feed
- My Profile (/profile)
- Package Details (/topup-details)
- My Packages (/my-packages)

### Network & History

- Deposit History (/deposit-history)
- Direct Team (/direct-team)
- Level Team / All Team (/all-team)

### Income Reports

- Daily ROI Income (/roi-income)
- Direct Income (/direct-income)
- Daily Level Income (/level-income)
- Monthly Salary (/salary-income)

### Financials & Support

- Wallet History (/wallet-history)

- Withdrawals (/withdrawals)
- Support and Raise Ticket (/support)

### **Additional member routes present in app**

- Credit to Wallet (/credit-to-wallet), My Transfers (/my-transfers)
- Notifications (/notifications)
- Staking Program (/staking-program) + staking income pages
- Community Income / Global Community / Community Access
- Downline Business, Fast Track Income, Transaction Details

## 6. Core Business Flow (How the product works)

### End-to-end user journey (GROW WEALTH)

- 1) Register under a sponsor and set BEP-20 withdrawal wallet
- 2) Login !' Dashboard shows balances & status (joined / not joined)
- 3) Deposit USDT BEP-20 (minimum needed for joining = \$1; user may deposit more anytime)
- 4) Activate Joining with \$1 only !' ID becomes active
- 5) After joining: user can deposit / top-up any amount as they wish
- 6) ROI 2% credited MANUALLY by Admin (available 24/7 — no auto cron required for v1)
- 7) Build team !' Direct / Level / Fast Track / Salary / Community incomes
- 8) Withdraw income to USDT wallet (trx password; active joining required)
- 9) Optional P2P fund transfer to another User ID

### Joining & Deposit rule (CLIENT CONFIRMED — Grow Wealth)

| Rule                            | Value                            |
|---------------------------------|----------------------------------|
| Product name                    | Grow Wealth                      |
| Joining / Activation amount     | \$1 ONLY                         |
| After joining – further deposit | Any amount (flexible)            |
| ROI rate                        | 2%                               |
| ROI availability                | 24/7                             |
| ROI credit mode                 | Manually by Admin                |
| First withdrawal minimum        | \$10                             |
| After first withdrawal          | Any amount                       |
| Payment method                  | Crypto Wallet only               |
| Wallet UX mode                  | C = Connect Wallet + Address/QR  |
| Currency / Network              | USDT BEP-20 (BSC)                |
| Database                        | MongoDB Atlas (growwealth)       |
| Supported wallets (typical)     | MetaMask, Trust, TokenPocket, WC |
| Purpose of \$1                  | ID activation / market entry     |

Crypto Wallet flow (OPTION C – BOTH): (1) Connect Wallet (MetaMask / WalletConnect) and pay USDT in-app. (2) Also show unique deposit address + QR so user can send from Trust Wallet or any external wallet app. (3) On-chain USDT received !' balance credited. (4) Withdrawals sent back to user's crypto wallet on BSC. No fiat rails in v1 unless client asks later.

Grow Wealth ROI:  $2\% \cdot 24/7 \cdot \text{Manual admin credit (not automatic)}$ . Reference site 5%/day auto packages are NOT our model.

### Crypto Wallet UX (CONFIRMED = Option C)

- Mode A: Connect Wallet button (WalletConnect / MetaMask) on deposit screen — in-app USDT transfer
- Mode B: Show unique deposit address + QR — user pays from any crypto wallet app
- Both modes available on the same Deposit page (tabs or side-by-side)

- Network guard: only BEP-20 / BSC — show “Wrong Network” if user is on Ethereum/TRC20
- Copy address, view on BscScan, deposit history with tx hash
- Withdraw to saved / connected wallet address with Transaction Password confirmation
- Admin: deposit watcher + manual verify fallback + withdrawal approve/payout

### Reference site SAVING packages (for comparison only – NOT our joining rule)

Live reference UI packages (roi \$ = 5% of price / day). Do not use \$2 as our minimum joining:

| Package  | Price \$ | Daily ROI \$ | Days | Total Profit \$ |
|----------|----------|--------------|------|-----------------|
| SAVING 1 | 2        | 0.10         | 25   | 2.50            |
| SAVING 2 | 5        | 0.25         | 25   | 6.25            |
| SAVING 3 | 10       | 0.50         | 25   | 12.50           |
| SAVING 4 | 20       | 1.00         | 25   | 25.00           |
| SAVING 5 | 50       | 2.50         | 25   | 62.50           |
| SAVING 6 | 100      | 5.00         | 25   | 125.00          |
| SAVING 7 | 200      | 10.00        | 25   | 250.00          |
| SAVING 8 | 500      | 25.00        | 25   | 625.00          |
| SAVING 9 | 1000     | 50.00        | 25   | 1250.00         |

### Deposit module

- User requests deposit address; UI supports Copy Address + QR
- Network: USDT BEP-20 only (Wrong Network warnings exist)
- Verification endpoint: /deposit/verify-deposit
- Live feed aggregates platform deposits (sample live stats seen: ~\$129,710 grand investment)
- Deposit history page lists user deposits / status / tx hash (BscScan link)

### Wallets & balances

- Fund / Top-up Wallet (for activating packages & transfers)
- Income / Withdrawable balances (ROI, Direct, Level, etc. combined view)
- USDT BEP20 wallet balance
- CCT balance (staking token)
- Wallet History audit of credits/debits

### Fund Transfer (P2P)

- Transfer from Available Fund Balance to another User ID
- Quick amount chips: \$1, \$5, \$10, \$20, \$50
- Requires Transaction Password
- Rules shown: Min \$1; irreversible; active package upgrade required

### Withdrawals (GROW WEALTH – client confirmed)

- User requests withdrawal of withdrawable income to saved BEP-20 address
- Confirmation modal + Transaction Password
- FIRST withdrawal: minimum \$10 required
- AFTER first successful withdrawal: user can withdraw ANY amount (no higher min)
- Track flag on user: hasCompletedFirstWithdrawal (or totalWithdrawn / withdrawalCount > 0)
- Admin approves/pays withdrawals to crypto wallet
- Reference site time windows (10 AM–12 PM) are NOT required unless client adds later

## 7. Income / MLM Modules

### A) ROI Income (Grow Wealth)

- REFERENCE site: ~5%/day automatic package ROI
- GROW WEALTH (client confirmed): ROI = 2%
- Availability: 24/7 (no time-window restriction for ROI operations)
- Credit mode: MANUALLY by Admin from Admin Panel (select user / batch !' credit 2% ROI)
- Member sees ROI history on /roi-income after admin credits
- No automatic ROI cron required for v1 (optional later if client wants automation)

### B) Direct Income

- Commission from direct referrals' business
- Report page: /direct-income
- Admin also has Direct Income management views

### C) Level / Community Level Income

- Multi-level team income based on downline structure
- All Team report shows level-wise counts
- Report page: /level-income

### D) Fast Track Offer (special promotion)

- Must complete minimum 6 direct referrals within 6 days of ID activation
- Rewards (paid for 10 days):
  - 6 directs !' \$6/day !' \$60 total
  - 10 directs !' \$10/day !' \$100 total
  - 25 directs !' \$25/day !' \$250 total
  - 100 directs !' \$100/day !' \$1,000 total
- Admin: Fast Track Report + Fast Track Tracker

### E) Monthly Salary / Reward ladder

Progression levels coded in UI (global team size + required directs unlock daily salary for N days):

| Lvl | Global Team | Directs | Daily \$ | Days | Total Earn \$ |
|-----|-------------|---------|----------|------|---------------|
| 1   | 20          | 1       | 1        | 10   | 10            |
| 2   | 40          | 2       | 1        | 20   | 20            |
| 3   | 100         | 3       | 1        | 40   | 40            |
| 4   | 200         | 4       | 1        | 80   | 80            |
| 5   | 400         | 5       | 1        | 150  | 150           |
| 6   | 1600        | 6       | 1        | 200  | 200           |
| 7   | 2000        | 8       | 2        | 250  | 500           |
| 8   | 3000        | 10      | 2        | 350  | 700           |
| 9   | 4000        | 12      | 2        | 500  | 1000          |
| 10  | 5000        | 14      | 3        | 500  | 1500          |
| 11  | 7500        | 16      | 6        | 500  | 3000          |
| 12  | 10000       | 18      | 10       | 500  | 5000          |

API: /user/salary-progress/:userId returns qualification flags (hasSelf50, l1/l2 counts, months paid, etc.).

## **F) Profit distribution messaging (community docs)**

- Mentioned split style: Direct & Level Income; 5% Rewards & Recognition; 70% Community Building & Fast Track
- Exact commission % tables for each level should be confirmed with client (not fully exposed as static % table in public UI)

## **G) Team / Genealogy**

- Direct Team list
- All Team / Level Team with level-wise counts
- Downline business reports
- Tree view endpoints: /user/tree/:userId
- Referral link / copy User ID tools

## 8. CCT Airdrop & Staking Program

---

Separate module from USDT packages. Member staking page shows:

- Available USDT BEP20 Balance
  - Available CCT
  - Total Staked / Total Staking Income
  - Staking Direct Income & Staking Level Income
  - Progress bar: Earned vs Max Cap when staked
  - Actions observed: BUY, Convert (\$!CCT), Stake/Reinvest Compound, CCT Transfer, Withdraw staking
  - APIs: /staking/stats, /staking/convert, /staking/reinvest-compound, /staking/cct-transfer, /staking/withdraw
  - Marketing mention: ~10% direct staking rewards (confirm exact staking ROI schedule with client)
  - Community roadmap text: CC Token planned ~2027, CMC/DEX listing vision
- 

## 9. Support, Notifications, Live Features

---

- Support tickets: create, list own tickets, admin reply/status/soft-delete
  - Notifications: user list + mark-read; admin create/broadcast
  - System Live Feed: scrolling/real-time style deposit feed + today/total investment stats
  - Live Trading page: large symbol list (BTCUSDT, ETHUSDT, many pairs) + price hooks
  - Device fingerprinting library present (anti-fraud / multi-account control)
- 

## 10. Admin Super Panel (/super-panal)

---

Hidden/secure admin portal (community-access key gate + admin login). Major modules:

### Users

- Dashboard overview
- All Users (search/pagination)
- User Address History
- Manage Roles & Leaders
- Change Sponsor (+ history)
- Blocked Users
- Add User / Manual verify / Login-as-user capability appears in UI strings

### Security

- IP Security rules / blocked countries
- Device Blocks (Fingerprint-based)
- Login Analytics

### Finance & Growth

- Top-Ups, Deposit Log, Address Monitor
- India Boost campaign controls
- Fast Track Report & Tracker
- Wallet & Directs stats, Wallet Summary, Wallet Update History
- Staking Analytics
- User Fund Overview, Lifetime Tx Report, User Directs (0–18+)
- Manual Deposit / Credit to Wallet tools
- Withdrawals queue: list, approve, leader auto-withdraw

- Transactions + reverse transaction
- Direct Income / Level Income admin reports
- Booster offer / reward send
- Promo video manager
- System settings toggles: Allow Login, Registrations, Top-Ups, Withdrawals, Wallet Transfers, Credit-to-Wallet, Maintenance Mode, Site Title, Support Email, Whitelist User IDs, Blocked Countries

## 11. Key API Surface (for developers)

---

Base URL: <https://worldfinance24.online/api>

### Auth

- POST /auth/register, /auth/login, /auth/forgot-password, /auth/reset-password/:token
- GET /auth/check-sponsor/:sponsorId

### User / Network

- GET /user/:userId, /user/direct-team/:userId, /user/all-team/:userId, /user/tree/:userId
- GET /user/downline-business/:userId, /user/salary-progress/:userId

### Wallet / Package / Deposit

- GET /wallet/info, /wallet/history/:userId, /wallet/topup-history/:userId, /wallet/withdrawals/:userId
- POST /wallet/transfer, /wallet/withdraw, /wallet/credit-to-wallet
- POST /package/activate ; GET /package/user/:userId
- GET /deposit/get-address ; POST /deposit/verify-deposit

### Income transactions

- GET /transaction/transactions/:userId?type=direct\_income|level\_income|fast\_track|staking\_\*

### Staking / Market / Support / Community

- Staking routes under /staking/\*
- GET /market/prices, /market/symbols
- Support /support/\* ; Community /community/global-list
- Admin namespace /admin/\* (large set covering all super-panel features)

---

## 12. Grow Wealth Scope – What We Need to Build

---

### Workstreams

- 1) Landing website branded Grow Wealth (Home, Joining info, FAQ, Login/Register)
- 2) Member panel with full sidebar modules listed in Section 5
- 3) Backend: Auth, Users, Sponsors/MLM tree, \$1 Joining, Manual 2% ROI credit (admin), Incomes, Wallets, Withdrawals
- 4) BEP-20 USDT deposit watcher + Connect Wallet + Address/QR + BscScan linking
- 5) Admin Super Panel (users, finance, security, settings, approvals)
- 6) Staking/CCT module (if client wants parity with reference)
- 7) Support tickets + notifications + live feed
- 8) Role permissions & system toggles (maintenance, allow withdraw, etc.)
- 9) MongoDB Atlas (growwealth) models & indexes

---

## 12A. BUILD PHASES (Grow Wealth) — How we build

---

Recommended delivery order. Each phase is usable / demo-able before the next starts. Stack: React (Vite) frontend + Node/Express API + MongoDB Atlas (growwealth) + USDT BEP-20.

### PHASE 0 — Project foundation (Day 1–2)

- Monorepo/folder: /client (React) + /server (Node API)
- Connect MongoDB Atlas growwealth; create base models skeleton
- Env config (.env): APP\_NAME, MONGODB\_URI, JWT\_SECRET, BSC\_RPC, USDT\_contract

- Grow Wealth branding tokens (colors, logo placeholder, site title)
- Deliverable: empty apps run locally + DB connected

### **PHASE 1 — Auth & member shell (core login)**

- Register (sponsor ID, name, email, mobile, password, country, BEP-20 wallet)
- Auto User ID (e.g. GW#####) + Transaction Password
- Login / Forgot password / JWT auth middleware
- Member layout: sidebar + Dashboard shell + Profile page
- Admin login + basic Admin layout
- Deliverable: Register !' Login !' see Grow Wealth dashboard

### **PHASE 2 — Deposit + \$1 Joining (money in)**

- Deposit page Option C: Connect Wallet (MetaMask/WC) + Address/QR
- BSC network guard (Wrong Network warning)
- Credit USDT deposits to Fund balance (watcher or verify tx)
- Activate Joining with \$1 only; mark user as joined/active
- After joining: allow any further deposit / top-up amount
- Deposit history + BscScan tx links
- Deliverable: User can deposit and activate \$1 joining

### **PHASE 3 — Manual ROI 2% (admin credit)**

- Admin tool: credit 2% ROI to one user or selected users (24/7 manual)
- ROI ledger / history on member /roi-income page
- Income balance updates after admin credit
- Deliverable: Admin manually pays 2% ROI; member sees it

### **PHASE 4 — Withdrawals (money out)**

- Withdraw request to saved/connected crypto wallet
- Rule: FIRST withdrawal minimum \$10; AFTER first success !' any amount
- Transaction Password confirmation
- Admin approve / reject / mark paid
- Withdrawal history for member + admin queue
- Deliverable: Full withdraw cycle with \$10-first rule

### **PHASE 5 — Wallet extras**

- Wallet history (all credits/debits)
- P2P Fund Transfer (User ID !' User ID) + trx password
- Credit-to-wallet / internal balance views
- Deliverable: Transfer + full wallet audit trail

### **PHASE 6 — Team / MLM network**

- Referral link + Copy User ID
- Direct Team + All Team / level-wise counts
- Direct Income + Level Income reports (after % table confirmed)
- Deliverable: Network tree + basic referral incomes

### **PHASE 7 — Growth incomes (optional / after % confirmed)**

- Fast Track offer module
- Monthly Salary / reward ladder
- Community pages if needed
- Deliverable: Advanced MLM incomes live

## PHASE 8 — Admin Super Panel (operations)

- All Users, search, block/unblock, change sponsor
- Deposits log, Address monitor, Top-ups
- Withdrawals queue, Manual ROI credit, Manual deposit verify
- System settings toggles (allow login/register/withdraw/transfer)
- Notifications + Support ticket reply
- Deliverable: Admin can run the platform day-to-day

## PHASE 9 — Landing website + polish

- Public Home branded Grow Wealth (\$1 join, 2% ROI, crypto wallet CTA)
- FAQ, Packages/Joining section, Login/Register CTAs
- Mobile responsive + UI polish matching reference dark/gold style
- Deliverable: Marketing site ready for demo

## PHASE 10 — Hardening & launch

- Security: rate limits, validation, trx password checks, IP/device basics
- UAT checklist with client; fix bugs
- Deploy frontend + API + confirm MongoDB Atlas network access
- Optional later: Staking/CCT, Live trading feed, auto ROI cron
- Deliverable: Production-ready Grow Wealth v1

## Phase priority for MVP (ship first)

- Must-have MVP = Phase 0 !' 1 !' 2 !' 3 !' 4 !' 9 (Auth, Deposit, \$1 Join, Manual ROI, Withdraw, Landing)
- Next = Phase 5 !' 6 !' 8 (Wallet transfer, Team, full Admin)
- Later = Phase 7 !' 10 extras (Fast Track/Salary, staking, hardening)

## Confirmed by client

- Product name = Grow Wealth
- Joining amount = \$1 only
- After joining, deposit any amount (flexible top-up)
- ROI = 2% · 24/7 · Manually by Admin (not auto)
- Withdrawal: first min \$10; after that any amount
- Payments via Crypto Wallet (USDT BEP-20) — deposit & withdraw
- Wallet UX = Option C: Connect Wallet (in-app) + Deposit Address/QR (both)
- Database = MongoDB Atlas (URI in .env; database name growwealth) — never commit credentials

## Still open – confirm before coding

- Manual ROI base: 2% of which balance — joining only, total deposit, or active investment amount?
- Exact Direct % and Level % commission table (1..N levels)
- Withdrawal fee (if any) and whether admin approval is always required
- Whether Telegram join is mandatory
- Whether CCT staking is required in v1
- Deposit architecture: HD wallet per user vs shared hot wallet + memo/tag vs one address per user
- Admin roles (super admin vs leaders) and payout automation rules
- Legal/compliance expectations for the target jurisdiction

---

## 13. Risk / Compliance Note (for client discussion)

The reference product markets "H5%/day auto; Grow Wealth uses 2% ROI, 24/7, manual admin credit. Still confirm legal structure before public launch.

---

## 14. Summary

---

Grow Wealth is the client product brand. It will be a full-stack USDT (BEP-20) investment + MLM platform inspired by World Finance 24: marketing site, member dashboard, multi-income engine, P2P transfers, withdrawals, live feed, support/notifications, and Admin panel.

GROW WEALTH RULES: Brand = Grow Wealth · Joining \$1 · flexible deposits · ROI 2% · 24/7 · Manual admin credit · First withdraw min \$10 then any amount · Crypto Wallet USDT BEP-20 · Wallet UX Option C · MongoDB Atlas (growwealth).

Build order: Phase 0 foundation !' Auth !' Deposit+\$1 Join !' Manual ROI !' Withdraw !' Wallet/Team !' Admin !' Landing polish !' Launch.
