

WORLD FINANCE 24

System Understanding Document

Clone / Rebuild Specification for Client Project

Reference URL: <https://worldfinance24.online/>
Dashboard: <https://worldfinance24.online/dashboard>

Prepared: 21 August 2026
Purpose: Document all features, UI, flows & business logic

This document is based on live site analysis (public pages + authenticated member APIs + frontend bundle review).

1. Document Overview

The client shared World Finance 24 as the reference product. This PDF captures what the live system is, how users and admins use it, which modules exist, and what must be rebuilt to deliver a same-style clone (BEP-20 USDT investment + MLM income platform).

What this system is

World Finance 24 is a web-based crypto investment / MLM (network marketing) platform. Users register under a sponsor, deposit USDT on Binance Smart Chain (BEP-20), activate investment packages, earn daily ROI plus network incomes, and withdraw to their USDT wallet. There is also a CCT token staking module and a full Admin Super Panel.

Tech stack observed

- Frontend: React SPA (Vite), React Router, Tailwind-style dark/gold theme, SweetAlert2, Ethers.js, FingerprintJS
- Backend API base: <https://worldfinance24.online/api> (Node-style REST; JWT auth)
- Blockchain: BSC / USDT BEP-20 deposits (unique deposit address per flow + BscScan tx links)
- Auth: User ID + password login; separate Transaction Password for fund actions; Admin portal with Admin ID + password
- OUR CLONE DATABASE (client): MongoDB Atlas — connection stored in project .env as MONGODB_URI (db name: worldfinance)

1A. CLIENT CONFIRMED RULES (Our Clone)

These rules override the reference site package minimums and ROI marketing. Build the new project according to this:

- JOINING AMOUNT = \$1 ONLY (minimum activation / ID activation starts at \$1)
- After joining with \$1, user can deposit ANY amount they want (no upper lock to fixed package-only top-ups unless client adds caps later)
- Marketing / Daily ROI promise = ~2% DAILY (NOT the reference site 5%)
- PAYMENT METHOD = CRYPTO WALLET (USDT on BEP-20 / BSC) — MetaMask, Trust Wallet, TokenPocket, WalletConnect, etc.
- Wallet UX = OPTION C (BOTH): (1) Connect Wallet in-app pay + (2) Deposit address + QR for manual send from any wallet app
- Deposit & Withdraw both via user crypto wallet (not bank / UPI / fiat gateway)
- User must connect or save their BEP-20 wallet address; deposits sent as USDT (BEP-20); withdrawals paid to same/saved wallet
- Market-aligned entry: low barrier joining (\$1) so more users can start, then flexible deposits
- Reference site used SAVING packages from \$2 / landing from \$10 / FAQ \$30 / 5% daily — DO NOT copy those for our clone
- Recommended flow: Register !' Connect Wallet and/or get Deposit Address+QR !' Deposit USDT "e \$1 !" Activate Joining (\$1) !' Further deposits anytime !' Earn ~2% daily !' Withdraw to crypto wallet

2. Branding & UI Design Language

- Brand: WORLD FINANCE24 (gold accent on FINANCE24)
- Primary palette: deep navy/black backgrounds (#0b101e, #131927), gold accents (#e4c568 / #d4af37), green for positive money (#00ff88 / emerald)
- Landing: glass header, gold gradient text, dark cards, package table, FAQ accordion, CTA "Create Free Account"

- Member area: left sidebar navigation (grouped sections), dark panels, metric cards, tables/lists for incomes & history
- Admin area: light theme sidebar (~260px), indigo active states, sectioned menus (Users, Security, Finance, etc.)
- Responsive: mobile-first grids (2-col cards), hamburger/drawer admin nav

3. Public / Marketing Website

Pages & navigation

- Home (/) – Hero, Ecosystem, How it works (3 steps), Packages, FAQ, CTA
- Login (/login) – Member login with User ID + Password + Forgot Password
- Register (/register) – Sponsor ID, personal details, country, BEP-20 wallet, terms
- Forgot / Reset password routes
- FAQ (/faq) and Community Access pages also exist in router

Landing value proposition (marketing copy)

- Claims deposits power HFT crypto trading + arbitrage + liquidity pooling
- Guaranteed 5% Daily ROI marketing message (REFERENCE site only — our clone uses ~2% daily)
- 3 steps: Deposit USDT (BEP-20) !' Activate Package !' Earn & Withdraw

Landing package table (marketing)

#	Amount	Cycle	Daily ROI	Total Return
1	\$10	25 Days	5%	\$12.50
2	\$50	25 Days	5%	\$62.50
3	\$100	25 Days	5%	\$125.00
4	\$250	25 Days	5%	\$312.50
5	\$500	25 Days	5%	\$625.00
6	\$1,000	25 Days	5%	\$1,250.00

REFERENCE ONLY: Live site FAQ ~\$30 min upgrade; SAVING packages from \$2. OUR CLONE (client confirmed): Joining starts at \$1 only; after that deposits are flexible / any amount.

Landing FAQ highlights

- Platform: decentralized crypto investment + daily ROI + referral bonuses
 - Activation: deposit USDT BEP-20, then activate package from dashboard
 - ROI: reference site = 5% daily / 25-day cycle | OUR CLONE marketing = ~2% daily
 - Withdrawals (landing FAQ): daily 10:00 AM – 12:00 PM IST; min ~\$1–\$2; active package required

4. Authentication & User Account

Registration fields (required)

- Sponsor ID (validated via API /auth/check-sponsor/:sponsorId)
- Name, Email, Mobile, Password, Confirm Password
- Country selector
- USDT BEP-20 Wallet Address (mandatory)
- Agree to Terms of Service
- On success: system returns generated User ID (format like WF#####) + Transaction Password (also emailed)

Login

- Credentials: User ID + Password + JWT token
- Sample analyzed member: WF7832865 (role: user), sponsor WF5678089
- Forgot password + reset-password/:token flows present

User profile data model (key fields)

- Identity: userId, name, email, mobile, role, sponsorId, createdAt, country
- Wallet: walletAddress + change history/limits; walletBalance; usdtBep20Balance
- Income buckets: directIncome, levelIncome, roiIncome, rewardIncome, fastTrackIncome, poolIncome (+ total* lifetime counters)
- Package state: isToppedUp, topUpAmount, packages[], activePools[]
- Network: directCount, globalTeamCount
- Flags: isTelegramJoined, pendingWithdrawals, totalWithdrawn, totalEarnings

5. Member Dashboard – Navigation Map

Authenticated layout uses a grouped left sidebar. Exact menu structure rebuilt from frontend:

Main Menu

- Dashboard (/dashboard)
- System Live Feed (/system-live-feed) – live deposit/investment ticker + totals
- Live Trading (/user/trading) – market symbols / trading UI feed
- My Profile (/profile)
- Package Details (/topup-details)
- My Packages (/my-packages)

Network & History

- Deposit History (/deposit-history)
- Direct Team (/direct-team)
- Level Team / All Team (/all-team)

Income Reports

- Daily ROI Income (/roi-income)
- Direct Income (/direct-income)
- Daily Level Income (/level-income)
- Monthly Salary (/salary-income)

Financials & Support

- Wallet History (/wallet-history)

- Withdrawals (/withdrawals)
- Support and Raise Ticket (/support)

Additional member routes present in app

- Credit to Wallet (/credit-to-wallet), My Transfers (/my-transfers)
- Notifications (/notifications)
- Staking Program (/staking-program) + staking income pages
- Community Income / Global Community / Community Access
- Downline Business, Fast Track Income, Transaction Details

6. Core Business Flow (How the product works)

End-to-end user journey (OUR CLONE)

- 1) Register under a sponsor and set BEP-20 withdrawal wallet
- 2) Login !' Dashboard shows balances & status (joined / not joined)
- 3) Deposit USDT BEP-20 (minimum needed for joining = \$1; user may deposit more anytime)
- 4) Activate Joining with \$1 only !' ID becomes active
- 5) After joining: user can deposit / top-up any amount as they wish
- 6) Daily ROI / incomes apply as per final client income rules on active deposit/package
- 7) Build team !' Direct / Level / Fast Track / Salary / Community incomes
- 8) Withdraw income to USDT wallet (trx password; active joining required)
- 9) Optional P2P fund transfer to another User ID

Joining & Deposit rule (CLIENT CONFIRMED)

Rule	Value
Joining / Activation amount	\$1 ONLY
After joining – further deposit	Any amount (flexible)
Marketing Daily ROI	~2% per day
Payment method	Crypto Wallet only
Wallet UX mode	C = Connect Wallet + Address/QR
Currency / Network	USDT BEP-20 (BSC)
Supported wallets (typical)	MetaMask, Trust, TokenPocket, WC
Purpose of \$1	ID activation / market entry

Crypto Wallet flow (OPTION C – BOTH): (1) Connect Wallet (MetaMask / WalletConnect) and pay USDT in-app. (2) Also show unique deposit address + QR so user can send from Trust Wallet or any external wallet app. (3) On-chain USDT received !' balance credited. (4) Withdrawals sent back to user's crypto wallet on BSC. No fiat rails in v1 unless client asks later.

Reference site SAVING cards (\$2–\$1000 fixed packages @ 5%/day) are NOT our model. Our clone: \$1 joining + flexible deposits + ~2% daily + crypto wallet (Connect + QR).

Crypto Wallet UX (CONFIRMED = Option C)

- Mode A: Connect Wallet button (WalletConnect / MetaMask) on deposit screen — in-app USDT transfer
- Mode B: Show unique deposit address + QR — user pays from any crypto wallet app
- Both modes available on the same Deposit page (tabs or side-by-side)
- Network guard: only BEP-20 / BSC — show “Wrong Network” if user is on Ethereum/TRC20
- Copy address, view on BscScan, deposit history with tx hash
- Withdraw to saved / connected wallet address with Transaction Password confirmation
- Admin: deposit watcher + manual verify fallback + withdrawal approve/payout

Reference site SAVING packages (for comparison only – NOT our joining rule)

Live reference UI packages (roi \$ = 5% of price / day). Do not use \$2 as our minimum joining:

Package	Price \$	Daily ROI \$	Days	Total Profit \$
SAVING 1	2	0.10	25	2.50
SAVING 2	5	0.25	25	6.25
SAVING 3	10	0.50	25	12.50
SAVING 4	20	1.00	25	25.00
SAVING 5	50	2.50	25	62.50
SAVING 6	100	5.00	25	125.00
SAVING 7	200	10.00	25	250.00
SAVING 8	500	25.00	25	625.00
SAVING 9	1000	50.00	25	1250.00

Deposit module

- User requests deposit address; UI supports Copy Address + QR
- Network: USDT BEP-20 only (Wrong Network warnings exist)
- Verification endpoint: /deposit/verify-deposit
- Live feed aggregates platform deposits (sample live stats seen: ~\$129,710 grand investment)
- Deposit history page lists user deposits / status / tx hash (BscScan link)

Wallets & balances

- Fund / Top-up Wallet (for activating packages & transfers)
- Income / Withdrawable balances (ROI, Direct, Level, etc. combined view)
- USDT BEP20 wallet balance
- CCT balance (staking token)
- Wallet History audit of credits/debits

Fund Transfer (P2P)

- Transfer from Available Fund Balance to another User ID
- Quick amount chips: \$1, \$5, \$10, \$20, \$50
- Requires Transaction Password
- Rules shown: Min \$1; irreversible; active package upgrade required

Withdrawals

- User requests withdrawal of withdrawable income to saved BEP-20 address
- Confirmation modal + Transaction Password

- Admin approves/pays withdrawals (approve APIs in admin)
- Community FAQ states minimum withdrawal \$10 (confirm with client vs landing \$1–\$2)
- Landing: processing window 10 AM–12 PM IST

7. Income / MLM Modules

A) Daily ROI Income

- REFERENCE site marketing: 5% of package amount per day
- OUR CLONE (client confirmed): marketing promise ~2% daily
- Report page: /roi-income
- Confirm with client: ROI cycle days (e.g. 25) and whether 2% applies on joining \$1 + all extra deposits the same way

B) Direct Income

- Commission from direct referrals' business
- Report page: /direct-income
- Admin also has Direct Income management views

C) Level / Community Level Income

- Multi-level team income based on downline structure
- All Team report shows level-wise counts
- Report page: /level-income

D) Fast Track Offer (special promotion)

- Must complete minimum 6 direct referrals within 6 days of ID activation
- Rewards (paid for 10 days):
 - 6 directs !' \$6/day !' \$60 total
 - 10 directs !' \$10/day !' \$100 total
 - 25 directs !' \$25/day !' \$250 total
 - 100 directs !' \$100/day !' \$1,000 total
- Admin: Fast Track Report + Fast Track Tracker

E) Monthly Salary / Reward ladder

Progression levels coded in UI (global team size + required directs unlock daily salary for N days):

Lvl	Global Team	Directs	Daily \$	Days	Total Earn \$
1	20	1	1	10	10
2	40	2	1	20	20
3	100	3	1	40	40
4	200	4	1	80	80
5	400	5	1	150	150
6	1600	6	1	200	200
7	2000	8	2	250	500
8	3000	10	2	350	700
9	4000	12	2	500	1000
10	5000	14	3	500	1500
11	7500	16	6	500	3000
12	10000	18	10	500	5000

API: /user/salary-progress/:userId returns qualification flags (hasSelf50, l1/l2 counts, months paid, etc.).

F) Profit distribution messaging (community docs)

- Mentioned split style: Direct & Level Income; 5% Rewards & Recognition; 70% Community Building & Fast Track
- Exact commission % tables for each level should be confirmed with client (not fully exposed as static % table in public UI)

G) Team / Genealogy

- Direct Team list
- All Team / Level Team with level-wise counts
- Downline business reports
- Tree view endpoints: /user/tree/:userId
- Referral link / copy User ID tools

8. CCT Airdrop & Staking Program

Separate module from USDT packages. Member staking page shows:

- Available USDT BEP20 Balance
 - Available CCT
 - Total Staked / Total Staking Income
 - Staking Direct Income & Staking Level Income
 - Progress bar: Earned vs Max Cap when staked
 - Actions observed: BUY, Convert (\$!CCT), Stake/Reinvest Compound, CCT Transfer, Withdraw staking
 - APIs: /staking/stats, /staking/convert, /staking/reinvest-compound, /staking/cct-transfer, /staking/withdraw
 - Marketing mention: ~10% direct staking rewards (confirm exact staking ROI schedule with client)
 - Community roadmap text: CC Token planned ~2027, CMC/DEX listing vision
-

9. Support, Notifications, Live Features

- Support tickets: create, list own tickets, admin reply/status/soft-delete
 - Notifications: user list + mark-read; admin create/broadcast
 - System Live Feed: scrolling/real-time style deposit feed + today/total investment stats
 - Live Trading page: large symbol list (BTCUSDT, ETHUSDT, many pairs) + price hooks
 - Device fingerprinting library present (anti-fraud / multi-account control)
-

10. Admin Super Panel (/super-panal)

Hidden/secure admin portal (community-access key gate + admin login). Major modules:

Users

- Dashboard overview
- All Users (search/pagination)
- User Address History
- Manage Roles & Leaders
- Change Sponsor (+ history)
- Blocked Users
- Add User / Manual verify / Login-as-user capability appears in UI strings

Security

- IP Security rules / blocked countries
- Device Blocks (Fingerprint-based)
- Login Analytics

Finance & Growth

- Top-Ups, Deposit Log, Address Monitor
- India Boost campaign controls
- Fast Track Report & Tracker
- Wallet & Directs stats, Wallet Summary, Wallet Update History
- Staking Analytics
- User Fund Overview, Lifetime Tx Report, User Directs (0–18+)
- Manual Deposit / Credit to Wallet tools
- Withdrawals queue: list, approve, leader auto-withdraw

- Transactions + reverse transaction
- Direct Income / Level Income admin reports
- Booster offer / reward send
- Promo video manager
- System settings toggles: Allow Login, Registrations, Top-Ups, Withdrawals, Wallet Transfers, Credit-to-Wallet, Maintenance Mode, Site Title, Support Email, Whitelist User IDs, Blocked Countries

11. Key API Surface (for developers)

Base URL: <https://worldfinance24.online/api>

Auth

- POST /auth/register, /auth/login, /auth/forgot-password, /auth/reset-password/:token
- GET /auth/check-sponsor/:sponsorId

User / Network

- GET /user/:userId, /user/direct-team/:userId, /user/all-team/:userId, /user/tree/:userId
- GET /user/downline-business/:userId, /user/salary-progress/:userId

Wallet / Package / Deposit

- GET /wallet/info, /wallet/history/:userId, /wallet/topup-history/:userId, /wallet/withdrawals/:userId
- POST /wallet/transfer, /wallet/withdraw, /wallet/credit-to-wallet
- POST /package/activate ; GET /package/user/:userId
- GET /deposit/get-address ; POST /deposit/verify-deposit

Income transactions

- GET /transaction/transactions/:userId?type=direct_income|level_income|fast_track|staking_*

Staking / Market / Support / Community

- Staking routes under /staking/*
- GET /market/prices, /market/symbols
- Support /support/* ; Community /community/global-list
- Admin namespace /admin/* (large set covering all super-panel features)

12. Clone Scope – What We Need to Build

Workstreams

- 1) Landing website (Home, Packages, FAQ, Login/Register) – dark gold theme
- 2) Member panel with full sidebar modules listed in Section 5
- 3) Backend: Auth, Users, Sponsors/MLM tree, Packages, ROI cron, Incomes, Wallets, Withdrawals
- 4) BEP-20 USDT deposit watcher (unique addresses or memo/tag strategy) + BscScan linking
- 5) Admin Super Panel (users, finance, security, settings, approvals)
- 6) Staking/CCT module (if client wants parity)
- 7) Support tickets + notifications + live feed
- 8) Role permissions & system toggles (maintenance, allow withdraw, etc.)

Suggested build phases

- Phase 1: Auth + Profile + Dashboard + Deposit + \$1 Joining activate + ROI engine
- Phase 2: Withdrawals + Fund transfer + Wallet history + Admin approvals
- Phase 3: Direct/Level incomes + Team reports + Referral links
- Phase 4: Fast Track + Salary ladder + Community features
- Phase 5: Staking/CCT + Live feed/trading UI + Hardening (device/IP security)
- Phase 6: Polish UI to match reference + UAT with client package/income rules signed off

Confirmed by client

- Joining amount = \$1 only
- After joining, deposit any amount (flexible top-up)
- Marketing daily ROI = ~2% (not reference 5%)

- Payments via Crypto Wallet (USDT BEP-20) — deposit & withdraw
- Wallet UX = Option C: Connect Wallet (in-app) + Deposit Address/QR (both)
- Database = MongoDB Atlas (URI in .env; database name worldfinance) — never commit credentials

Still open – confirm before coding

- ROI cycle length on \$1 joining + extra deposits (e.g. 25 days, or until capital returned, or ongoing?)
- Exact Direct % and Level % commission table (1..N levels)
- Withdrawal min amount, fees, and time window
- Whether Telegram join is mandatory
- Whether CCT staking is required in v1
- Deposit architecture: HD wallet per user vs shared hot wallet + memo/tag vs one address per user
- Admin roles (super admin vs leaders) and payout automation rules
- Legal/compliance expectations for the target jurisdiction

13. Risk / Compliance Note (for client discussion)

The reference product markets "H5%/day; our clone marketing is ~2%/day per client instruction. Still confirm legal structure, disclosures, and sustainable economics before public launch.

14. Summary

World Finance 24 is a full-stack USDT (BEP-20) investment + MLM earnings platform with: marketing site, member dashboard, multi-income engine (ROI, Direct, Level, Fast Track, Salary), P2P transfers, withdrawals, live deposit feed, optional CCT staking, support/notifications, and a large Admin Super Panel. A faithful clone requires both the member experience and the admin/operations backend—not only a landing page.

OUR PRODUCT DIFFERENCE (client): Joining \$1 only · flexible deposits · ~2% daily marketing ROI · Crypto Wallet USDT BEP-20 · Wallet UX Option C (Connect Wallet + Address/QR) · MongoDB Atlas database.
